Summary

Software Architect with **15+ years** designing and scaling national-scale distributed platforms, enterprise GenAI/LLM solutions, and cloud-native systems across Financial Services, Automotive, and Public Digital Infrastructure. Open Group certified Architect with deep expertise in large-scale system design, agentic AI, and regulated API ecosystems. Proven record delivering **\$25M+** annual productivity gains, **99%** AI cost reduction, and platforms processing **1M+ daily transactions** at enterprise scale.

Professional Experience

Kyndryl Solutions Pvt. Ltd.

Bangalore, India

Associate Director, Software Architecture

Jan 2022 – Present

- Architected **RBI Unified Lending Interface (ULI)**: API-driven platform integrating 18 lenders and 40+ financial services, handling **1M+ API calls/day** and accelerating credit access by **40%** in a regulated, high-availability environment.
- Led architectural evolution of **ONDC Gateway & Registry 3.0**: enabled zero-downtime ecosystem migration, backward compatibility, and transaction reliability across distributed open-commerce participants.
- Designed **hybrid edge-cloud AI proctoring platform** for Jain University supporting **1,000+ concurrent users** and **140,000+ exam sessions**, reducing cloud AI processing costs by **99%** while sustaining detection accuracy.
- Built **enterprise GenAI ecosystems** with agentic RAG pipelines for Hero MotoCorp and Honda MSSI, automating market intelligence and knowledge workflows across automotive verticals.
- Delivered **multilingual AI translation framework** for Mercedes-Benz R&D achieving BLEU score of **73.7** and reducing manual translation effort by **75–80%**, accelerating multilingual content distribution across business units.
- Delivered **AI-enabled contract decision engine** eliminating Kyndryl’s manual contract-to-signings process, reducing cycle time from months to minutes and generating **\$25M+ annual productivity and leakage savings**.
- Led architecture for **Kyndryl’s Agentic AI Application Modernization** offering on Microsoft Azure; prepared solution for Azure Marketplace launch to drive autonomous engineering at scale.
- Launched **self-service AI document translation platform** integrating Azure and Google cloud services, delivering **10x operational efficiency** and cutting time-to-market by **160 days**.
- Designed **GenAI-powered Kubernetes automation** for Kaiser Permanente, cutting configuration effort by **60%** and accelerating environment provisioning by **30%** in regulated cloud environments.
- Developed AI-assisted tooling for legacy-to-IaC (Terraform/Ansible) migration, reducing migration timelines by **50%** and standardizing governance across hybrid cloud estates.

IBM India Pvt. Ltd.

Bangalore, India

Software Architect

Mar 2011 – Dec 2021

- **Modernization Platforms**: Led engineering of the IBM Software Defined Modernization and Migration platform, enhancing workload migration efficiency by **30%** through automated workflows.
- **Cloud Infrastructure & Resilience**: Architected hybrid cloud solutions (SDDC, SDS, SDN) implementing BCDR strategies that improved infrastructure performance by **20%** and system resilience by **25%**.
- **Digital Transformation**: Delivered secure digital identity verification systems (document + selfie analysis) to mitigate fraud; engineered Salesforce-based grant management systems for government sectors, streamlining administrative overhead.
- **DevOps Automation**: Engineered a **ReactJS and GitHub Actions** automation framework to standardize infrastructure and application stack deployment across public clouds.

Skills

AI & ML: GenAI, LLM Architectures, Agentic Workflows, RAG Pipelines, NLP, Machine Translation, Computer Vision, MLOps, Model Fine-Tuning

Cloud & Infrastructure: AWS, Azure, GCP, Kubernetes, Containerization, Edge-Native Architecture, SDDC/SDN, Disaster Recovery

Architecture: Enterprise Architecture (Open Group), Distributed Systems, Microservices, API-led & Event-Driven Design, Hybrid/Multi-Cloud Strategy

Data & Integration: Vector Databases, NoSQL & Relational Systems, API Ecosystems, Data Pipelines, Graph Databases (Neo4j)

DevOps & Automation: Terraform, Ansible, CI/CD Automation, Cloud Security, Infrastructure as Code

Languages: Python, Java, REST APIs

Education

IIIT Bangalore

India

PG Diploma, Artificial Intelligence & Machine Learning

2024 – 2025

IIIT Bangalore

India

PG Diploma, Software Engineering

2019 – 2020

University of Southern Queensland

Australia

M.S., Information Technology

2004 – 2006

Certifications

Open Group Certified IT Architect • Neo4j Certified Professional • HashiCorp Certified: Terraform Associate • VMware Certified Professional • Cisco Certified • RedHat Certified
